

# Eastern Washington Local Food Directory for Schools and Farms

The purpose of this database is to facilitate the collaboration between farmers and schools to increase use of locally grown whole foods in local schools. This database will be updated annually and will help students access healthy, whole foods and farmers to find reliable year-round markets. The information was collected through surveys sent to farmers and schools and posted on the <https://www.slcss.org/> website. If you would like to fill out the survey for your farm or district please use the following links:

- Farmers: [Farmer and Product Questionnaire](#)
- School Districts: [School District Produce Needs Questionnaire](#)

Additional resources for Farm to School are available from:

- Farm to School Program Manager, Walla Walla Sustainable Living Center, [farmtoschool@slcss.org](mailto:farmtoschool@slcss.org)

## How to Use the Local Food Directory

<b>Produce/Crop List by Farm.....</b>	<b>3</b>
lists produce/crops alphabetically and the farms growing those crops, so that schools can search by crop, click on farm hyperlink to go to farm page and learn more about them and find contact info for them	
<b>Farm List .....</b>	<b>7</b>
lists Farms alphabetically that are selling, or are interested in selling, to districts	
<b>School List .....</b>	<b>8</b>
lists school districts in Eastern Washington that are involved in farm to school purchasing and the crops they have indicated they would like to purchase, click on the hyperlink to go to school description pages	
<b>School Description Pages.....</b>	<b>9</b>
<b>Farm Description Pages .....</b>	<b>18</b>

**Schools:** You can use the produce/crop list (pg3) to find vendors of locally produced items. Or you can refer to the farm list (pg7) to find a particular farm. Either way, the farm hyperlink will take you to the farm page to provide contact information, crops, the seasons when products are available, and the farm description.

**Farmers:** Please use the school list (pg8) to find school district buyers looking for the produce, legumes, meat or grain that you want to sell. Nutrition Services Directors' contact information is listed and it is recommended that you send an introductory email and follow up with a phone call or an arranged visit to sample your product. Sending weekly fresh sheets detailing your produce availability and price may also be recommended. School districts will expect you to deliver your high quality produce. Your farm may not be expected to supply the entire "estimated amount needed" by a school unless you have a forward contract in place with the school district. We recommend using this directory in conjunction with [Tips for Farmers Selling to Schools](#).

## Produce/Crop List by Farm

Seasons:

F = Fall - September, October, November

W = Winter - December, January, February

Sp = Spring - March, April, May

Su = Summer - June, July, August

YR = Year Round

## Birch Creek Farm

**Contact:** John Bleth

**Email:** jbleth57@gmail.com

**Phone:** 509-520-1090

**Mailing Address:** 1909 J B George Rd, Walla Walla, WA 99362

**Website:**

**Farm size:** 7-8 acres

**Liability Insurance:** 1 million

**Farm description/message to Schools:** Birch Creek Farm is a mixed produce farm that primarily uses organic practices, though is not certified organic. We have grown quite a bit in the last five years. Greg and I started gardening for our own use 18 years ago, and it just started getting bigger. Just in the last 4 years we have started having members, who are able to pick their own veggies once a week. We also sell things to Andy's market and restaurants in the area. Just recently we have started selling produce to the foodbank, though have donated to the foodbank prior to that.

**Certifications:**

**Delivery:**

**Invoices for Later Payment:**
